# The impact of innovation

## 5G Network Slicing: a technology born from Innovation

### Leading the 5G slicing market

- National Firsts
- 5 services
- 92% coverage
- 3.5GHz leader
- 100% green

### Pioneers in Europe

- 5G+
- 2 bands
- Slicing 10%
- Cloud
- Secret.T
- Smartphones

The logo for '112 emergencias extremadura' is a green circle with the number '112' in white and the text 'emergencias extremadura' below it.

# PROBLEM! Current Situation in extraordinary emergencies...

## A NEED for evolution:

Which use cases is 112 Extremadura testing?

### 5G Slicing

3500MHz and 700MHz

### Cell on wheels + slicing

Backhaul links

### Mission Critical Services

MCX (MCPTT-Video-Data)  
User Experience

# OPPORTUNITY APPEARS: LET'S GO!

02

# Network Slicing: a commercial reality

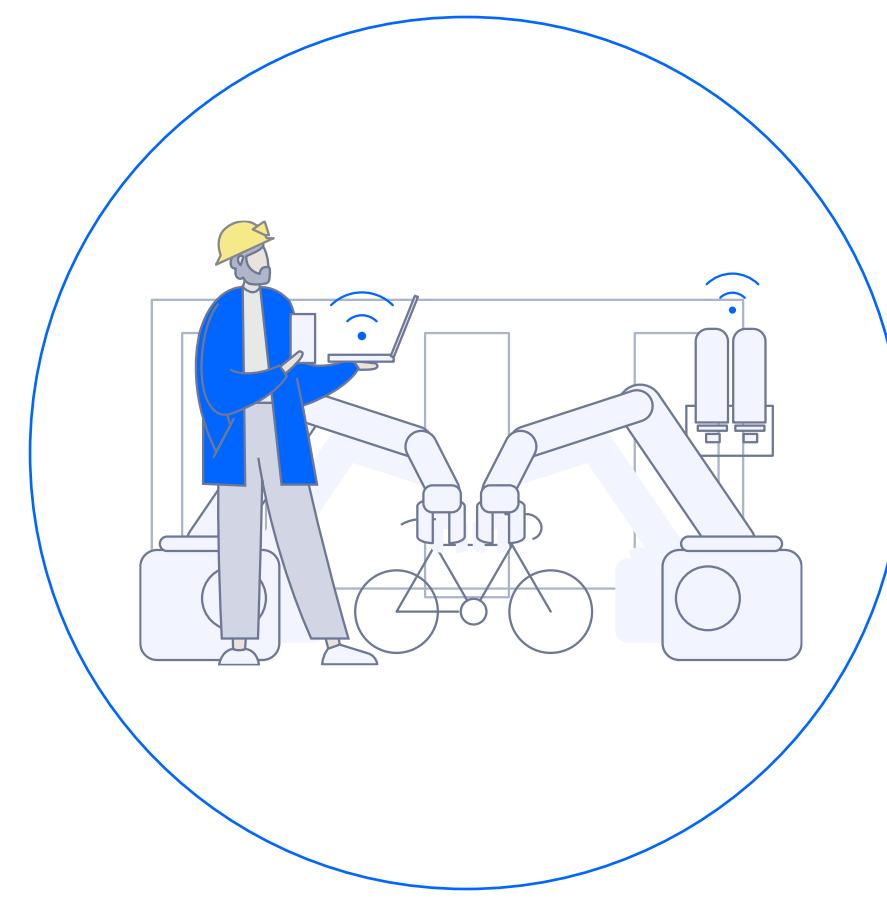

# Mobile connectivity has become more relevant for B2B customers and best effort is not good enough for all use cases

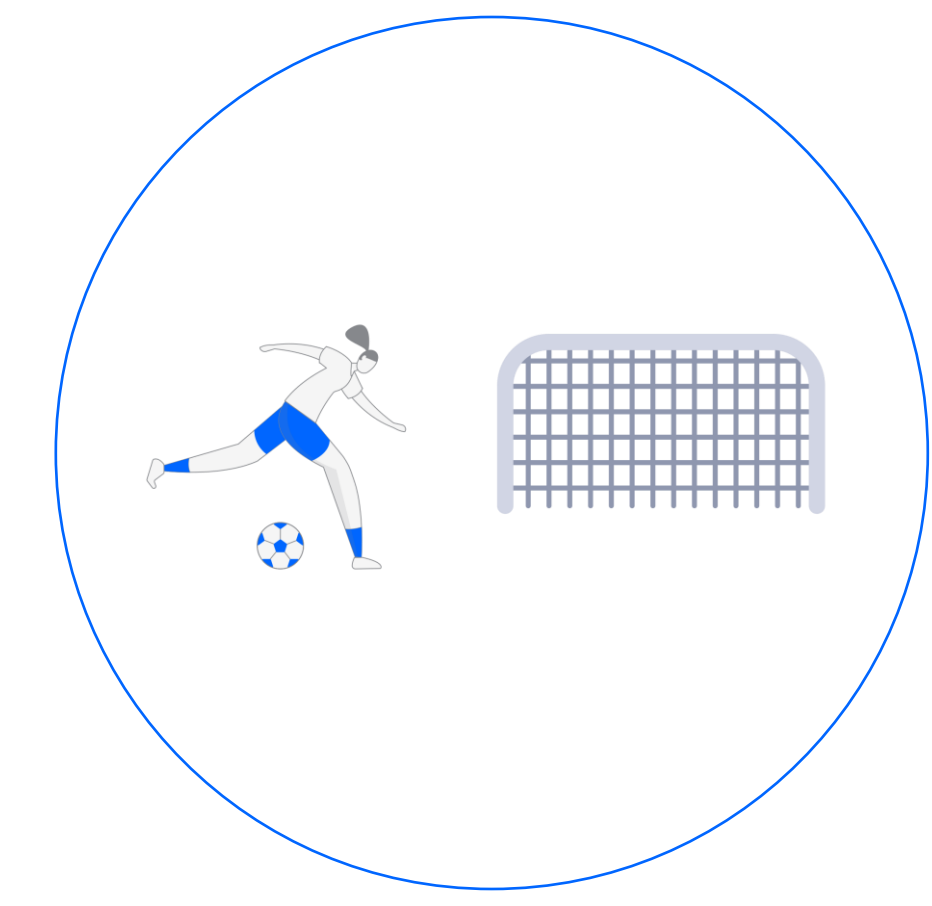

Workforce on the go

Critical devices

Fixed network  
redundancy / alternative

High density  
environments

# Slicing

Network technical capability to provide **differentiated quality of service** on the mobile network

# Mobile QoD API

3<sup>rd</sup> party B2B/B2B2X services or fast PoCs

*Mobile QoD API service*

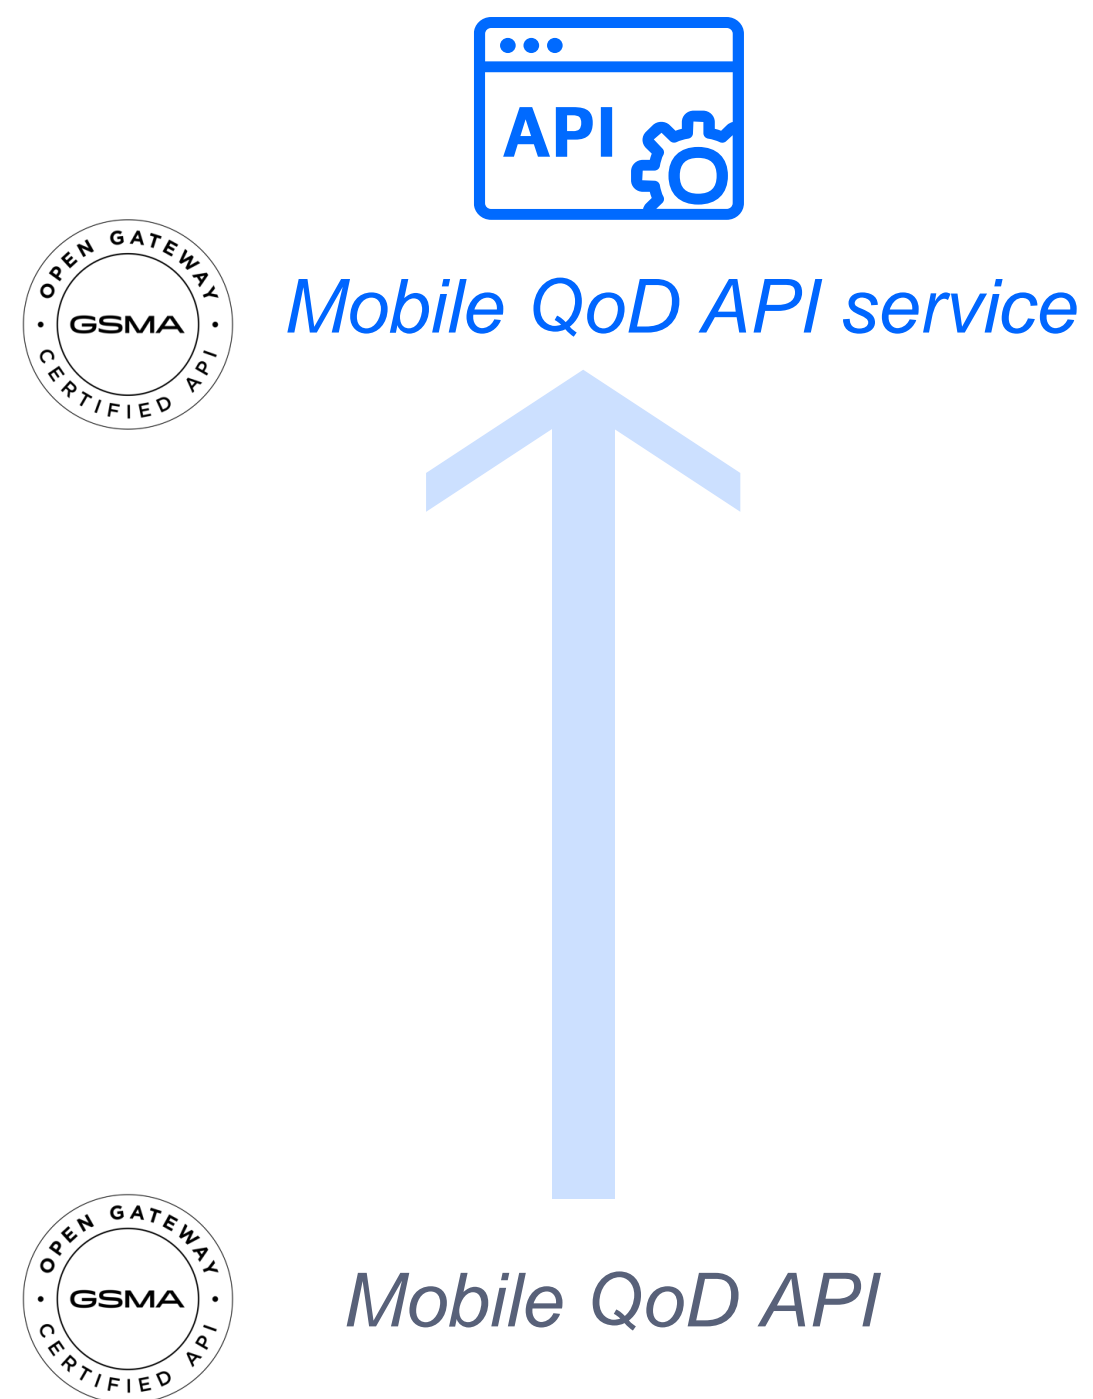

Network & IT Systems Slicing capability

# Slicing is now a commercial reality incorporated in Telefonica Spain's portfolio

## Mobile QoD API

3<sup>rd</sup> party B2B/B2B2X services or fast PoCs

## Movistar Intranet Premium & Red privada virtual

Private 5G as a Service over the public network

## WAN underlay (VPN-IP 5G / DIBA 5G)

Primary or back-up connectivity for CPE in customer sites

## Corporativo Móvil 5G Premium

Premium service for VIP / Critical B2B customer lines

COMING SOON

## 5G Misión Crítica

Mobile connectivity for Public Safety services (police, firefighters...)

COMING SOON

Network & IT Systems Slicing capability

## An API-first approach based on Open Gateway APIs has accelerated Product Innovation whilst improving efficiency

- Immediate replicability across portfolio – Faster TTM
- Flexible and agile operating and business models
- Enable 3<sup>rd</sup> party global innovators with multi-telco footprint
- Improve cost efficiency

**03**

# **The future of Network Slicing**

## Network Slicing can enhance even more the customer experiences

**TELEFONICA IS LEADING MAIN TELCO STANDARDS EVOLUTION TO TAKE NETWORK SLICING EXPERIENCES TO THE NEXT LEVEL:**

**DELIVERING THE CUSTOMER THE CONTROL OF WHICH SPECIFIC APPLICATIONS ARE USING WHICH CONNECTIVITY SERVICE**

### **APP TOKEN DEFINITION IN GSMA**

- Keeping customer privacy
- Authenticating applications with tokens
- Ensuring service integrity
- CUSTOMER owns the steering rules

**ADVANCED COLLABORATIVE NETWORK PROTOCOLS TOGETHER WITH NETWORK SLICING CAN ACHIEVE LOWER LATENCIES, LOWER PACKET LOSSES AND SCALABLE THROUGHPUT EVEN DURING CONGESTION SITUATIONS**

### **L4S IMPLEMENTATION**

- Customer device, 5G RAN, 5G CORE and OTT collaborate to adapt bitrates during congestion
- Applicable on specific Network Slices

**INDUSTRIALIZATION OF NETWORK SLICES NEEDS TO BE A REALITY EVEN IN NETWORK SHARING SCENARIOS: TELEFONICA IS WORKING ON THE DEFINITION OF THE DYNAMIC NETWORK SLICING IMPLEMENTATION BETWEEN OPERATORS**

# Wrapping up

**JUNTA DE EXTREMADURA**

Consejería de Presidencia, Interior y Diálogo Social
